Smart Solutions

For human talent management

The Problem

Do you leave it to luck to find the right candidate?

The lack of competencies and job skills, high turnover rates, inefficient recruitment, selection, and hiring processes, generating a constant investment of time, reprocesses, money, and instability.

02

**RECRUITMENT,
SELECTION, AND
HIRING.**

RECRUITMENT

Our commitment is to acquire the ideal personnel guaranteeing our client's satisfaction in delivery times and quality. We have perfectly adapted tools and tests, which allow us to analyze personality, intelligence, and behavior.

The Solution

AN INTELLIGENT SELECTION PROCESS

TALENT + TECHNOLOGY

We provide intelligent and predictive services and solutions for Recruitment, Selection, Hiring, Administration, and predictive services and solutions for Recruitment - Selection - Hiring - Administration, and Integral Management of Human Talent. Optimizing processes, reducing costs, reprocesses, and most importantly, suitable candidates with legal assurance prioritizing the sense of belonging and organizational commitment (culture).

How does it work?

Blockchain is integrated for storing, sharing, and feeding information. Machine Learning allows computers to learn from the tasks and data supplied to the system, allowing these to be executed without the need for human intervention. With the help of this technology in **LOOGAN**, we improve management considerably in human resources organizations, every day learning more about their workforce and their needs for recruitment, selection, hiring, retention, among others.
